Properties:

AKEMI® Rust Remover is an intensive cleaning agent based on inorganic acids with non-ionic surfactants and rust inhibitors. The product is free from hydrochloric acids. The surfactants contained are biodegradable in correspondence with the legal regulations for surfactants.

Application Area:

AKEMI® Rust Remover is suitable for removing surface rust stains as well as rust stains caused by indwelling rust on acid-resistant natural and artificial stone. Occlusions on natural stone (granite, gneiss) which cause the rust are enveloped thus inhibiting the formation of new rust. AKEMI® Rust Remover is ideal for floor coverings. The use of AKEMI® Rust Remover Paste gel-like is recommended for vertical surfaces as well as for facades and wall coverings.

Instructions for Use:

- 1. Apply undiluted with a solid brush or spatula to the absolutely dry stone surface. To avoid new rusting on untreated surfaces and changes in colour, apply to the complete stone surface.
- 2. Allow the product to work for up to 24 hours.
- 3. Avoid drying of treated surfaces. It is recommended to cover them with a plastic film.
- 4. Rinse thoroughly with water until any excess of the product has been taken off.
- 5. Repeat process on dry stone if necessary.
- After the stone has been successfully treated, it is recommended to
 protect it with either AKEM® Stone Impregnation of AKEMI® Stain
 Repellent products in order to prevent watery substances from
 penetrating into the stone as an additional measure against new
 rust.

Special Notes:

- For professional use only.
- Rust Remover damages calcareous stone and must therefore in no case be applied on polished marble, limestone, terrazzo, eloxal and enamel. If in doubt, test on an inconspicuous area.
- Before starting it is recommended to prepare a sample area in order to evaluate the cleaning power and appearance of the treated object and to ascertain the material consumption as exactly as possible.
- Do not allow contact with plants, otherwise rinse immediately with water. Concentrated and diluted solutions must not be emptied in plantations.
- If the product is given a particularly long time to work, it may cause slight colour darkening on some types of stone. This usually disappears if it is washed off intensively several times using a lot of water with AKEMI® Stone Cleaner added.
- For proper waste disposal, the container must be completely emptied.
- Recycling in accordance with the guidelines of EU Decision 97/129 EC on the Packaging Directive 94/62/EC.

Technical Data: Coverage: approx. 10 - 20 m²/litre (if applied purely)

Colour: vellowish

Density: approx. 1.20 g/cm³

pH value: < 1

TDS 01.22

Storage: If stored in dry and cool condition (5-25°C/41-77°F) in its closed original

container at least 24 months from production.

Health & Safety: Read Safety Data Sheet before handling or using this product.

Important Notice: The above information is based on the latest stage of development and

application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trails of the product, in an inconspicuous area or fabrication of a sample

piece.
